(54) Title: MULTIPARTY CALL OF PORTABLE DEVICES WITH PARTY POSITIONING IDENTIFICATION

(57) Abstract: The present invention relates to a portable communication device, a method for engaging the portable communication device in voice communication with other parties, a communication connection device to be engaged in voice communication and a system for engaging said portable communication device in voice communication, with other parties. The method for engaging a portable communication device in voice communication with a number of parties, according to the present invention, comprises: establishing connections between the portable communication device and at least two other parties, (step 202), positioning the other connected parties at different positions in space in relation to the portable communication device, (step 206), and providing information in relation to the position of one of the other connected parties, (steps 208 and 216), when this connected party provides audio information over said connection, so that the user of the device can more easily identify which party is active.
